Experience

Software Engineer, Full Stack | *Inkphase*

Nov 2025 – Present | Dhaka, Bangladesh

- Worked as a full-stack engineer across 4 production web-applications, including 2 SaaS products (a contact management platform, and an AI chatbot service) handling both frontend and backend delivery for client projects across various industries.
- Built REST APIs and database schemas across **PostgreSQL**, **MySQL**, and **NoSQL**; worked on query performance, data integrity, and role-based access control for live applications.
- Built a JSON-to-XML transformation service for a client using **Django** and **PostgreSQL**, covering nested schema mapping, structured data conversion, and input validation.
- Contributing to a high-traffic news platform ahead of launch handling frontend implementation and participating in architecture discussions around scalability, caching, and database design.
- Managed deployments across **Firebase**, **Vercel**, and **cPanel**; used **Git-based deployment workflows**, handled application updates, and supported production maintenance including basic security practices (CSRF protection, JWT authentication, rate limiting).

Education

East West University

Dhaka, Bangladesh | 2022 – 2025

B.Sc. Computer Science & Engineering — Intelligent Systems and Data Science

Medha Lalon Scholarship (top 3.2% of all students)

Skills

Languages	Python, JavaScript, TypeScript, Java, C#
Frameworks	Laravel, Angular, Next.js, Django, React, Node.js, FastAPI, .NET
Data & Infra	PostgreSQL, MySQL, MongoDB, Docker, Firebase, cPanel, Vercel, Linux, CI/CD, Git
AI / ML	PyTorch, NLP, Computer Vision, Transformers, LLMs, Vector Embeddings

Projects

HealthSync — AI Healthcare Diagnostic Platform

[GitHub](#) | Laravel, FastAPI, PyTorch, MySQL, Docker | 2025

- Built an end-to-end AI system for kidney stone detection using a hybrid Vision Transformer model with self-supervised learning on **10k+ curated medical image samples**, achieving **98.6% diagnostic accuracy**.
- Integrated a **FastAPI inference service with a Laravel backend** for real-time prediction and API-based model serving.

Multi-tenant AI Chatbot Platform

[GitHub](#) | Laravel, JavaScript, MySQL, OpenRouter API | 2026

- Built a multi-tenant LLM chatbot platform using **OpenRouter API** with isolated conversations and per-client configuration support.
- Developed a framework-agnostic JavaScript embed layer deployable across React, Next.js, Angular, Laravel, Django, Flask, Node, and Shopify environments.
- Built an admin dashboard for prompt configuration, chatbot behavior control, and tenant-level management; deployed to production on cPanel.

MemoraAI — Alzheimer's Companion App

[GitHub](#) | Flutter, Node.js, Supabase, Twilio | 2026

- Built an AI companion app for Alzheimer's patients with **real-time voice conversation, medication reminders, and mood tracking** using a patient-safe prompt engineering system.
- Designed full-stack architecture using **Supabase (PostgreSQL)** for persistent patient data, Node.js for backend logic, Twilio for caregiver SMS alerts, and OpenRouter API for LLM inference.
- Implemented a caregiver dashboard with live check-in logs, reminder management, and automated emergency SMS alerts on distress detection.

Publications & Datasets

- **MAE-ViT: Hybrid SSL ViT for Kidney Segmentation** | ICCIT 2025 | doi:10.1109/ICCIT68739.2025.11491313
- **EDIBLESEED Dataset** | Mendeley Data, 2025 | doi:10.17632/9xgk2vc3sv.2

Leadership & Activities

Editor & Creative Lead, EWU Robotics Club (2023–25) — managed technical branding and club communications.
LFR Team Leader (2024) — led hardware and firmware team for a line-following robot.

Volunteer: Girl Guides | Bangladesh Red Crescent Society **Languages:** Bangla (Native), English (Fluent)
